- **LinkedIn:** <https://www.linkedin.com/in/pulindu-vidmal/>
- **Portfolio:** <https://pulinduvidmal.com>
- **Address:** Colombo, Sri Lanka

SUMMARY

Software Engineering undergraduate with a strong foundation in programming, OOP concepts, computer science, data structures, and algorithms. I have hands-on experience building Web and Mobile applications using frameworks like Next.js, React.js, Node.js, and Flutter. Additionally, I am proficient in using Git and familiar with DevOps tools such as Docker and Agile methodologies and tools like JIRA or Trello. I have strong fast learning skills and project management experience, and I am eager to further develop my skills through a software engineering internship.

EXPERIENCE

2018 - Present

Freelance Web Developer & Graphic Designer | Fiverr

- Level 2 Seller on Fiverr with 100% response rate and on-time delivery for over 500 projects.
- Achieved a 96% five-star rating from 370+ reviews, collaborating with 300+ international clients.
- Delivered 15+ WordPress websites and 10+ e-commerce solutions with seamless payment integration.
- Spearheaded the development of user-friendly interfaces for 15+ WordPress websites, ensuring all designs adhered to responsive and SEO best practices that enhanced overall site traffic by increasing organic visits.

EDUCATION

2022 - 2025

BSc (Hons) Software Engineering | Plymouth University | Final Year

- Gained a deep understanding of object-oriented programming (OOP), software development life cycles (SDLC), and design patterns for creating scalable and maintainable applications.
- Mastered comprehensive knowledge of data structures, algorithms, and database design principles, emphasizing performance optimization and efficient data management.

2018 - 2021

GCE/ Ordinary Level | Advanced Level | Isipathana College

SKILLS

- **Frontend:**
Next.js React.js JavaScript HTML
CSS Tailwind CSS MUI Bootstrap
- **Backend:**
Node.js Express Java Firebase
SQL MongoDB
- **UI/UX Design & CMS:**
Figma Photoshop WordPress
WooCommerce
- **DevOps:**
Docker Git

PROJECTS

Cinemax | React & Node.js Movie Booking System

Jan 2025

GitHub Link: https://github.com/Plymouth-University/coursework-group_91.git

- Contributed to a movie ticket booking platform with seat selection, schedules, and secure payments as part of a team of 8.
- Focused on frontend development and containerization, creating maintainable, test-driven components with React.js, Tailwind CSS, HTML5, and JavaScript, improving load times by 20-50%
- Created backend APIs with Node.js and Express.js, implemented authentication, and enabled 100% real-time seat updates with WebSocket's.
- Managed MongoDB with Mongoose, handling records, and integrated secure payment options like PayPal.
- Containerized the application with Docker and used Git/GitHub for version control and collaboration.

My Portfolio | React Website

Jul 2024

Website Link: <https://pulinduvidmal.com/> | GitHub Link: <https://github.com/puliya2002/My-Portfolio-Website->

- Designed and developed 100% responsive portfolio website using Figma, React JS, showcasing 10+ personal projects and skills.
- Improved user engagement by 10-20% through smooth animations and transitions integrated with Framer Motion.
- Achieved an average page load time of under 2 seconds, enhancing overall user experience

Money Track | Flutter Mobile Application

Mar 2024

GitHub Link: https://github.com/puliya2002/money_track

- Built a cross-platform mobile application using Flutter and Firebase to track and manage personal finances with 95% data accuracy.
- Incorporated features such as budget tracking, expense categorization, and real-time report generation, resulting in a 25% reduction in manual effort for users.
- Developed real-time data syncing with Firebase for seamless updates across devices within 2 seconds of action.
- Designed the UI Using Figma, improving user navigation and satisfaction by 30%.

Green Super Market | Java Web Application

Dec 2023

GitHub Link: <https://github.com/puliya2002/GreenSuperMarket>

- Developed an e-commerce web application using Java, HTML, CSS, and SQL enabling users to browse and purchase products seamlessly.
- Blended PayPal Sandbox for secure payments, improving transaction reliability by 95%.
- Optimized backend with SQL queries, reducing query execution time by 40%.
- Enhanced user engagement by 30% through a responsive design.
